

ACCESS DATA INSTALLATIONS (ADI)

DELIVERING STRUCTURED CABLING INFRASTRUCTURE PROJECTS ON TIME AND IN BUDGET

ADI was formed in 1996 and today is one of the premier data communications providers in Ireland. We design, manage, supply, install and commission your entire ICT network platform to the highest of standards. We service a wide range of industries across sectors and our most significant client base is comprised of pharmaceutical and mission critical plants.

Fibre Optic

ADI deploy all the latest fibre optic solutions including OM3 & OM4 Multimode and OS1 & OS2 Singlemode fibre optic solutions.

Structured Cabling

ADI can Install, Test and Commission Cat5e, 6, 6a and Cat 7 cabling systems. We hold accreditations from Commscope/ Systimax, TE and Siemon and offer a 20 year manufacturer's warranty on complete structured cabling systems.

Project Management

ADI employs BICSI RCDD professionals with a wealth of international experience to offer solutions and manage your project from a conceptual phase right through to client handover. We don't subcontract work, which ensures your installation is to the highest standard and best practice at all times.

Data Centres

We provide a turnkey solution including all cabinets fully customised with cooling and airflow solutions, power metering and monitoring and cable containment systems. We can fit-out data centres with the latest cold aisle/ hot aisle containment technology to significantly reduce energy usage and carbon footprint. We offer a full remedial re-patching and tidying service including full network documentation which can transform your IT room or data centre from a cluttered, untidy area to a state of the art, well administered network space.
